EDUCATION

Indiana University

Bachelor of Science in Intelligent Systems Engineering (Bioengineering Concentration)

Bloomington, IN
Expected May 2029

Luddy Living Learning Member | Hutton Honors Scholar | Provost Scholar | Groups Scholar

TECHNICAL SKILLS

Languages: Python, C, R

Developer Tools: Git/GitHub, Linux

Libraries & Visualization: Pandas, NetworkX, NumPy, Matplotlib, Vega, Jupyter Notebook, Gephi

Design & Creative Software: Photoshop, Illustrator, Premiere Pro, Lightroom, InDesign, Fusion 360, PrusaSlicer

WORK EXPERIENCE

Undergraduate Research Assistant

Laboratory for Computational Epidemiology and Public Health

May 2026-Present
Bloomington, IN

- Apply bioengineering and data-analysis skills to support infectious-disease and mosquito-forecasting research, using quantitative models to inform public-health decision-making.

Undergraduate Research Assistant (IUUR)

Cyberinfrastructure for Network Science Center (CNS)

Jul 2024-Present
Indiana University Bloomington

- Updated and validated more than 4,000 anatomical structures for the Human Reference Atlas using Python and Jupyter Notebooks.
- Validated biological relationships and adapted the visualization pipeline to generate organ-specific multiscale trees.
- Developed and documented a Python utility that automated repetitive visualization-update tasks for future Human Reference Atlas releases.
- Presented research on Human Reference Atlas visualization at the IU 2025 Summer Poster Symposium.
- Initially served as a graphic designer, creating visual and video content to communicate CNS research and increasing social-media engagement by approximately 50%.
- Produced visual content for *Atlas of Macroscopes*, published by The MIT Press.

Teaching Assistant

Indiana University Bloomington - Innovation and Design (ENGR E-101)

Nov 2025-Present
Bloomington, IN

- Grade assignments and mentor students during class and office hours for a class of 33.
- Guide students during class and office hours, reinforcing engineering and design concepts.

Front Cashier and Server

Fazoli's Restaurant

Apr 2024-May 2025
Bloomington, IN

- Communicated with guests to provide excellent customer service and handled cash transactions efficiently.

PROJECTS

Human Reference Atlas Organ-Specific Visualization | *Research Project*

May 2026-Present

- Built a Vega-based visualization pipeline for organ-specific multiscale anatomical trees.
- Created reusable Python workflows and configuration files for organ-specific visualization generation.

Environmental Awareness Bee Game | *Software Systems Engineering Course*

Apr 2026-May 2026

- Implemented a grid-based educational game in C using arrays, structures, functions, and file handling.
- Promoted environmental awareness through interactive gameplay and strategic decision-making.

Robot Rescue | *Innovation and Design Course*

Nov 2025-Dec 2025

- Designed an educational board game teaching AI literacy and iterative learning to students ages 10-14.
- Presented the design process and completed prototype in a final course presentation to peers and instructors.

COMMUNITY INVOLVEMENT

Director of Marketing & Communications

ColorStack at IU

Apr 2026-Present
Indiana University Bloomington

- Manage chapter branding, social media, and event promotions across multiple platforms.

Member

Turkish Student Association at IU

Aug 2025-Present
Indiana University Bloomington

- Organize annual events for more than 300 attendees; recruited more than 40 new members through the Involvement Fair.

CONFERENCES

Grace Hopper Conference

Conference Attendee

Nov 2025
Chicago, IL

- Selected as one of 40 students from more than 200 applicants to attend the Grace Hopper Celebration.
- Attended a large career expo with major companies including Amazon, Disney, and Goldman Sachs.
